

# Chapter 22: Short-term Uses versus Long-term Productivity

## 22.1 Regulatory Setting

The Council on Environmental Quality's (CEQ) regulations for implementing the National Environmental Policy Act (NEPA) require an Environmental Impact Statement (EIS) to address the relationship between short-term uses of the environment and the maintenance and enhancement of long-term productivity (40 Code of Federal Regulations [CFR] Section 1502.16). The Federal Highway Administration's (FHWA) guidelines for environmental documents state that an EIS should discuss in general terms the proposed action's relationship of local short-term impacts and use of resources, and the maintenance and enhancement of long-term productivity, including recognition that transportation improvements are based on state and/or local planning that considers the need for present and future traffic requirements within the context of present and future land use development (FHWA 1987).

## 22.2 Short-term Uses versus Long-term Productivity

The local short-term impacts and uses of resources associated with the action alternatives can be compared to the maintenance and enhancement of the long-term productivity for the area. Because the area adjacent to State Route (S.R.) 210 in the Salt Lake Valley is mostly developed or has been affected by past development, the action alternatives would not alter the long-term productivity of the area's natural resources.

In general, the short-term use of the forest in Little Cottonwood Canyon by the action alternatives would be a negative impact to the long-term productivity of the land as a natural resource. Forest outside the area converted to project use would remain in conservation or recreation use, and the action alternatives would not alter the long-term productivity of those areas.

The S.R. 210 Project would be consistent with transportation plans and would support regional projections of increases in population. The project would improve the long-term productivity of the area by addressing the transportation needs on S.R. 210.
